

MegaBrite™ Tooth Powder

Introducing a Whole New Way to Clean Your Teeth

100g – Product Code 5100

www.flantechaustralia.com

Clean and brighten your teeth like never before with the first Mega H®-charged tooth powder. Thousands of people have brushed their teeth with Mega H®, but they had to break open a capsule, pour out a portion of the contents, then attempt to close the capsule.

They did this because of the fantastic results they received. Now, with MegaBrite, you'll never have to do that again.

Mega H®

A known antioxidant that reduces surface tension for a better clean. It also increases alkalinity and neutralises mouth acids to help fight tartar.

Xylitol

A saccharide found naturally in plants, fruits, and vegetables. This natural sweetener tends to neutralise mouth acids.

Aloe Powder

Powdered aloe vera which is proven to be beneficial for epithelial tissue.

Other ingredients include:

Calcium Carbonate

This is the abrasive cleaning ingredient.

Sodium Bicarbonate

A buffer added for pH control.

Magnesium Carbonate

Whitening agent and polisher.

Potassium Phosphate

Added for its role in controlling tartar.

Peppermint Oil and Menthol

These are natural flavourings.

Silica

Mineral added as an absorbent for the oils.

Glycine

Natural sweetener.

Quillaja

Organic foaming agent.

Sodium Alginate

Natural binder and stabiliser derived from seaweed.

Potassium benzoate

Preservative.

This product is not intended to diagnose, treat, cure or prevent disease.
